

Sample DCW Speaking Proposal

Session Title: 3 DCIM Tools, 3 DC Managers and 3 Perspectives

Speakers Submitted (with full contact details & 100-word bios)

Ryan Gruver, (IT Director, Banner Health)
Cy Sinclair, (Infrastructure Support Team Leader, Bloomberg)
Bill Kleyman, (Board Member, Neu.ro)
Christian Bingham, (Product Manager, Aptum)

Conference Track: Emerging IT & Data Center Technologies

Format: 50-Minute Conference Session

All Levels

Session Description:

Every single digital infrastructure needs a method to manage their critical infrastructure. Today, the adoption of DCIM has reached the mainstream. As an industry, we've moved from whether or not to use it, but how to use it. According to AFCOM's State of the Data Center Survey – most data centers are using DCIM for environmental monitoring, security, facility, and power/energy management. However, using DCIM for AR/VR, CFD, and integration with other smart systems is less common. Now, new solutions around energy and even digital twins are impacting how DCIM systems are being deployed and utilized. This session will turn to data center practitioners and end-users to understand the benefits of common integrations and the challenges and solutions for utilizing more advanced integrations with DCIM.

Bill Kleyman will moderate a discuss with three end-users of three-different types of DCIM products: Sunbird, Nlyte and a Custom-built solution. It will be an honest and open conversation that encourages audience questions & participation.

Audience Takeaway:

DCIM: What's different? Why is this technology so important today?
Understand how your peers are using DCIM
Learn where the find the greatest ROI
Peer-to-peer advice on vendors of DCIM
Advice for overcoming challenges with advanced usage of DCIM (automation, CFD, etc.)
The future of DCIM: building management, CMMS, digital twins, and more
